

Attachment for Sweeper

Attachments for Sweepers - Forklifts made by AUSU, offer absolute functionality and are well known for their highly modular, ergonomic and compact design. They provide stability and versatility while handling awkward or really heavy loads on the jobsite, while being extremely safe to control. With regards to various lift trucks, AUSA models have a large diameter of their wheels that helps to guarantee favorable load suspension in the cab and in the blades. This allows the lift truck to produce an optimum working productivity over variable and rough surfaces.

AUSA company head office is located in Manresa, Spain which is located in the interior of the region of Barcelona. The production plant is also at this location and boasts a total surface area of more than sixty four thousand square meters. AUSA has subsidiaries situated in the Madrid, France, Florida, China, UK and Germany. The business exports over 60% of the equipment they make and sells its goods all through 225 distributors all over seventy nations.

Each lift truck constructed by AUSA is obtainable outfitted together with their automatic hydrostatic transmission. This provides automatic braking in deceleration and precision movement of the forklift giving an additional level of productivity and safety. The hydrostatic transmission enables the individual operating it to quickly adapt to the lift truck which is significant if the load is not easy to handle and whenever terrain circumstances are difficult.

AUSA forklifts offer a special cabin design like no other on the market. It is frontal folded to make it much easier to access for periodical maintenance. These highly modular cabins also come in soundproof closed, semi-closed or open. For northern weather heated cabins are an option, plus, air conditioning is integrated in a back post of the cabin. Various tire widths, grips and attachments are even offered so as to suit whatever of the lift truck units.

AUSA is among the world leaders in compact equipment, specializing not just in rough terrain forklifts but even site dumpers, urban sweepers and tool carrier vehicles. With service and sales all around seventy nations within 5 continents and over 200 sales depots all around the globe, AUSA is an industry leader.
